## Professional Summary

Full Stack Engineer with 5 years building and scaling production **Ruby on Rails** and **React** systems for global remote teams. Proven track record modernizing legacy systems, improving reliability and performance, and shipping user-focused features end-to-end. Comfortable in distributed Agile teams across US and UAE timezones.

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                   |

## Software Engineer

Biomark – Healthcare platform for secure patient-doctor-lab connectivity

Singapore – Remote

Jun 2022 – Jan 2023

- Developed **HIPAA-compliant** data pipelines using **HL7 APIs**, enabling secure healthcare data exchange and reducing manual processing by **47%**.
- Automated onboarding workflows and designed modular healthcare microservices, boosting team productivity by **70%** and developer efficiency by **30%**.
- Implemented Rails best practices for modularity and separation of concerns, laying the groundwork for a scalable API architecture.

## Software Engineer

SaaS LTV Growth – E-commerce app for revenue optimization

Wilmington – Remote

Jun 2021 – Jun 2022

- Migrated REST endpoints to the **Shopify GraphQL API** with CI/CD via **GitHub Actions**, reducing server load by **36%** and accelerating release cycles.
- Optimized background job queues with **Redis** batch processing, eliminating **N+1** queries and improving resource usage by **43%**.
- Reduced **Largest Contentful Paint** by **72%** via Redis caching and backend query optimization. Built product customization features that lifted customer engagement by **37%**.

## Projects

---

### Inte veo (Communication Platform)

[ecolink.inteveo.com](https://ecolink.inteveo.com)

- EcoLink is a communications platform integrating RingCentral with agency management systems like Vertafore, enabling seamless call routing, SMS, voicemails, and compliance for insurance agencies.

### Escrow.sa (Software Escrow Platform – KSA)

[escrow.sa](https://escrow.sa)

- A tri-party software escrow platform for the Saudi market that holds vendor source code in an encrypted vault and releases it to beneficiaries only under legally defined conditions, with bilingual Arabic/English support and Saudi data residency.

### AgencyPortal (Multi-Tenant Umrah Travel SaaS)

[hasnaintravel.com](https://hasnaintravel.com)

- A multi-tenant SaaS for Umrah travel agencies that unifies inventory and bookings from 12 supplier portals into one branded interface, with per-agency custom domains and live production deployment.

### Intellirent (Real-Estate | Rental-Marketing)

[myintellirent.com](https://myintellirent.com)

- A platform that allows rental marketing agents to display property listings and streamlines applicant submissions with automated screening features.

### Biomark (HealthCare)

[biomarking.com](https://biomarking.com)

- A platform that connects patients, doctors, and labs to facilitate secure, real-time updates and data sharing between parties.

### SaaS LTV Growth (E-Commerce)

[product-customizer](https://product-customizer)

- An app enabling merchants to offer customizable product options (engraving, color swatches, image uploads) with enhanced visuals and premium charges, increasing revenue and personalization.

## Skills

---

**Languages:** Ruby, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

**Frameworks & Libraries:** Ruby on Rails, React, Redux, React Query, Stimulus, Tailwind CSS, Styled Components

**APIs & Integrations:** REST, GraphQL, WebSockets, Action Cable, RingCentral, Vertafore, Applied EPIC, Infobip, 8x8, Shopify, HL7

**AI in Production:** LLM-backed transcription & summarization pipelines, sentiment scoring, OCR (Groq / Llama 4 Scout), Action Cable streaming for live AI updates, prompt engineering, OpenAI APIs

**Databases & Caching:** PostgreSQL, MySQL, Redis, Firebase (NoSQL)

**Cloud & DevOps:** AWS (Lambda, S3, CloudWatch), Docker, CI/CD (GitHub Actions, Jenkins), Heroku

**Testing & Tools:** RSpec, Jest, Git, GitHub, Postman, Jira, Agile/Scrum
