Professional Summary

Full-Stack **Ruby on Rails** Engineer with 4+ years shipping production **Rails 5/7/8** and **React** systems for global remote teams. Strong in legacy Rails modernization, **REST** and **GraphQL** API design, real-time features, and performance work with **TDD** (RSpec) and **CI/CD**. Independently shipped three **AI-native production builds**: **Escrow.sa** (Rails 8 software escrow, KSA data-residency), **AgencyPortal** (multi-tenant Umrah travel SaaS with scripted Selenium logins against 12 supplier portals), and **Yushas Collection** (Rails 8 storefront), pairing daily with Claude / Codex as core engineering tooling.

Work Experience

Senior Software Engineer – Devsinc | Lahore, Pakistan – Hybrid **Jun 2022 – Present**
Full-Stack Engineer staffed across US and global client engagements

Full-Stack Engineer **California – Remote**
Ecolink – Communication platform for insurance agencies **Feb 2025 – Apr 2026**

- Implemented an **AI call pipeline** that converts audio into transcripts and summaries via an internal AI microservice with live **Action Cable** updates, reducing manual effort by **50%**.
- Launched **IQ**, an **AI-driven Priority Task Board** that turns each transcribed call into prioritized actionable items (Growth / Maintenance / Relationship) with sentiment scoring and AI insights, boosting agent follow-up efficiency by **90%**.
- Created **multi-tenant** real-time communication workflows on **Action Cable**, **WebSockets**, and **Turbo Streams** for live call routing, chat, SMS, and compliance logging.
- Integrated CRM's (**RingCentral**, **Vertafore**, **Applied EPIC**, **Infobip**, **8x8**).
- Shipped a **RingCentral** Call Analytics Reporting Module with scheduled **SendGrid** email delivery, **PDF** exports, and a daily/bi-weekly metrics aggregation service.

Software Engineer **Wilmington – Remote**
SaaS LTV Growth – E-commerce app for revenue optimization **Nov 2024 – Feb 2025**

- Migrated REST endpoints to the **Shopify GraphQL API** with CI/CD via **GitHub Actions**, reducing server load by **36%** and accelerating release cycles.
- Optimized background job queues with **Redis** batch processing, eliminating **N+1** queries and improving resource usage by **43%**.
- Reduced **Largest Contentful Paint** by **72%** via Redis caching and backend query optimization, while delivering product customization features that lifted customer engagement by **37%**.

Full-Stack Engineer **Texas – Remote**
Intellirent – Real estate and rental marketing and applicant screening **Jan 2023 – Dec 2024**

- Constructed automated fraud and identity checks using **Experian APIs**, cutting manual verification time **90%** and improving applicant risk scoring accuracy.
- Redesigned **React** front-end on **GraphQL** with **DRY Rails** refactors, cutting API load **40%**, lifting responsiveness **55%**, and lowering server costs **20%**.
- Revamped a 10-year-old legacy PDF generation system, achieving **63%** faster execution, **77%** lower memory, and **33%** fewer errors (verified via Scout APM).

Software Engineer **Singapore – Remote**
Biomark – Healthcare platform for secure patient-doctor-lab connectivity **Jun 2022 – Jan 2023**

- Hardened **HIPAA-compliant** data pipelines using **HL7 APIs**, enabling secure healthcare data exchange and reducing manual processing by **47%**.
- Automated onboarding workflows and decomposed healthcare logic into independent microservices, boosting team productivity by **70%** and developer efficiency by **30%**.
- Restructured the Rails codebase along clear domain boundaries with reusable service objects and well-defined API contracts, simplifying downstream feature work.

AI-Native Projects

Independent, AI-assisted builds shipped end-to-end (architecture, code, deploy) pairing with Claude / Codex for daily engineering.

Full-Stack Engineer

Riyadh – Remote

[Escrow.sa](#) – Software escrow platform for the Saudi market

- Architected and shipped a tri-party software escrow platform end-to-end on **Rails 8** with **Hotwire**, **PostgreSQL**, **Solid Queue**, and **action_policy** RBAC, plus bilingual Arabic/English UI with full RTL support.
- Engineered an encrypted **Forgejo Vault** with scheduled mirroring, **SHA-256** deposit integrity verification, and a senior-engineer manual review workflow.
- Designed a multi-stage release-approval pipeline on **AASM** state machines and **PaperTrail**, with append-only audit logs hosted in the **KSA zone** for Saudi data-residency and CST compliance.

Founder & Lead Engineer

Self-directed

[AgencyPortal](#) – Multi-tenant SaaS for Umrah travel agencies

- Bootstrapped a multi-tenant **Rails 8** SaaS end-to-end with custom-domain tenancy, **Pundit** RBAC, and the Solid stack (**SolidQueue**, **SolidCache**, **SolidCable**) with zero Redis dependency.
- Authored a portal-integration layer with **scripted logins and data fetchers against 12+ supplier portals** (cookie sessions, JWT SPAs, **TOTP-secured Selenium** flows) behind common Fetcher, Booker, and SessionManager services, with end-to-end sync reduced to **1 minute**.
- Modeled a booking state machine with audience-aware hold timers and a double-entry ledger for stacked per-agent and per-portal markups. Deployed via **Kamal** to **Hetzner** with **Cloudflare** and **Caddy** on-demand TLS. Live in production.

Founder & Lead Engineer

Self-directed

[Yushas Collection](#) – Rails 8 storefront for Pakistani unstitched fabric

- Stood up a greenfield **Rails 8.1** storefront end-to-end on **PostgreSQL 18 multi-DB** (primary / cache / queue / cable) with **Hotwire** (Turbo + Stimulus), **Tailwind v4**, and zero Node toolchain via **importmap-rails**.
- Mapped the full catalog domain (Category, Collection, Product, ProductVariant, ProductPhoto) and shipped a complete order lifecycle for the local market: bank transfer + cash-on-delivery, confirm → ship → mark_delivered → cancel state transitions.
- Themed the storefront via **SiteSetting** (colors, fonts, contact, shipping) and data-driven homepage blocks. Wired **Solid Queue / Cache / Cable** on Postgres with no Redis, deployed live via **Kamal** with **Caddy** TLS.

Technical Skills

Languages: Ruby, JavaScript (ES6+), TypeScript, Python, SQL, HTML, CSS

Frameworks & Libraries: Ruby on Rails (5/7/8), React, Redux, Hotwire (Turbo, Stimulus), Tailwind CSS, Pundit, Devise, Service Objects

APIs & Integrations: REST, GraphQL, WebSockets, Action Cable, JWT, OAuth, RingCentral, Vertafore, Applied EPIC, Shopify, Stripe, SendGrid, HL7

AI in Production: LLM-backed transcription & summarization pipelines, sentiment scoring, OpenAI APIs, prompt engineering

Databases & Background Jobs: PostgreSQL, MySQL, Redis, Sidekiq, Solid Queue

Cloud & DevOps: AWS (Lambda, S3, CloudWatch), Docker, Kamal, CI/CD (GitHub Actions, Jenkins), Capistrano, Heroku, Cloudflare, Hetzner

Testing & Tools: RSpec, Capybara, FactoryBot, Jest, TDD, Git, GitHub, Postman, Jira, Agile/Scrum

Education

Bachelor of Science – Computer Science

2022

Namal College – Associate College of University of Bradford, UK | GPA: 3.5
