Professional Summary

Full Stack Engineer with 4+ years of experience building and scaling web applications for global remote teams. Specialized in **Ruby on Rails** and **React**, delivering features end-to-end across backend APIs, databases, and responsive user interfaces. Strong in RESTful and GraphQL APIs, PostgreSQL performance tuning, background job processing, and AWS-based deployments.

Proven track record in modernizing legacy systems, improving reliability and performance, and shipping user-focused features with measurable impact. Comfortable in distributed Agile teams with a strong focus on clean architecture, CI/CD automation, and test-driven development.

Work Experience

Full-Stack Engineer

California – Remote

Ecolink – Communication platform for insurance agencies

Dec 2024 – Present

- Worked on **multi-tenant** real-time communication workflows using **Action Cable**, **WebSockets** and **Turbo Streams**, enabling live call routing, chat, SMS and compliance logging.
- Integrated and enhanced CRM and telephony integrations (**RingCentral**, **AMS360**, **Applied EPIC**, **Infobip**, **8x8**), improving reliability and data consistency across systems.
- Delivered responsive UI/UX across devices, contributing to a **50%** increase in customer engagement.
- Integrated a Slack bot to generate bi-weekly user reports (PDF & CSV), reducing manual reporting effort by **80%**.
- Shipped features end-to-end in an Agile, test-driven environment, collaborating with design, product and QA to meet sprint goals.

Full-Stack Engineer

Texas – Remote

Intellirent – Real estate and rental marketing and applicant screening

Jan 2023 – Dec 2024

- Built automated fraud and identity checks using **Experian APIs**, reducing manual verification time by **90%** and improving applicant risk scoring accuracy.
- Customized **ActiveAdmin** with custom filters to streamline internal operations, improve record discovery, and speed up admin-side workflows.
- Introduced **React Hooks**, **Context API** and reusable components for property listing and application flows, improving code reusability and front-end maintainability.
- Collaborated with design teams to ship pixel-perfect UI/UX aligned with Figma prototypes, boosting user satisfaction and engagement.
- Revamped a 10-year-old legacy PDF generation system, achieving **63%** faster execution, **77%** lower memory usage and **33%** fewer errors (verified via Scout APM).

Software Engineer

Singapore – Remote

Biomark – Healthcare platform for secure patient-doctor-lab connectivity

Jun 2022 – Jan 2023

- Built HIPAA-aware healthcare integrations using HL7 APIs and modular Rails services, improving secure data exchange and onboarding efficiency.

Software Engineer

Wilmington – Remote

SaaS LTV Growth – E-commerce app for revenue optimization

Jun 2021 – Jun 2022

- Implemented subscription management workflows for merchants (plan upgrades, renewals, usage tracking), improving recurring revenue stability and reducing billing issues.
- Migrated REST endpoints to the **Shopify GraphQL API** and implemented CI/CD via **GitHub Actions**, reducing server load by **36%** and accelerating release cycles.
- Optimized background job queues with **Redis** batch processing, eliminating **N+1** query issues and improving resource usage by **43%**.
- Implemented product customization features (engraving, swatches, image uploads), increasing customer engagement by **37%** and boosting merchant revenue.
- Reduced **Largest Contentful Paint (LCP)** by **72%** via Redis caching and backend query optimization in an MVC architecture.

Projects

Inteveo (Communication Platform)

ecolink.inteveo.com

- EcoLink is a communications platform integrating RingCentral with agency management systems like AMS360, enabling seamless call routing, SMS, voicemails, and compliance for insurance agencies.

Intellirent (Real-Estate | Rental-Marketing)

myintellirent.com

- A platform that allows rental marketing agents to display property listings and streamlines applicant submissions with automated screening features.

Biomark (HealthCare)

biomarking.com

- A platform that connects patients, doctors, and labs to facilitate secure, real-time updates and data sharing between parties.

Saas LTV Growth (E-Commerce)

[product-customizer](https://product-customizer.com)

- An app enabling merchants to offer customizable product options (engraving, color swatches, image uploads) with enhanced visuals and premium charges, increasing revenue and personalization.

Mindrift (Tendem Data Collection)

toloka.ai/tendem

- Executed Tendem data collection and web scraping/parsing workflows using Apify to generate clean, structured datasets for AI tasks.

Revelo (Behavioral Data - Architecture & Strategy Annotation)

revelo.com

- Contributed to Anthropic-linked behavioral data annotation by evaluating strategy/architecture responses with structured rubrics for quality and consistency.

Technical Skills

Languages: Ruby, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frameworks & Libraries: Ruby on Rails, React, Next.js, Redux, React Query, Stimulus, Tailwind CSS, Styled Components

APIs & Integrations: REST, GraphQL, WebSockets, Action Cable, RingCentral, AMS360, Applied EPIC, Infobip, 8x8, Shopify, HL7

AI & Data: LLM evaluation, behavioral data annotation, prompt quality review, data collection, web scraping/parsing, Apify

Databases & Caching: PostgreSQL, MySQL, Redis, Firebase (NoSQL)

Cloud & DevOps: AWS (Lambda, S3, CloudWatch), Docker, CI/CD (GitHub Actions, Jenkins), Heroku

Testing & Tools: RSpec, Jest, Git, GitHub, Postman, Jira, Agile/Scrum

Education

Namal College - An Associate College of University of Bradford, UK

Bachelor of Science - BS, Computer Science

Graduated
